

November 19, 2021

The Honorable Jon Tester
United States Senate
311 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Tester,

In Montana, our connection to the outdoors is a way of life. With your seniority in the United States Senate, you are in a unique position to represent Montana values as Congress considers major investments in America's infrastructure, including our public lands and clean energy economy. This summer is a historic opportunity to address the climate crisis and demonstrate that bold climate policy goes hand in hand with providing economic opportunities to all Montanans and Americans.

In a state that boasts some of the most beautiful National Parks, forests, rivers, and wildlife in the world, Montanans know firsthand just how important it is to protect and conserve our outdoor spaces for future generations. Because of that, we encourage you to highlight the critical role Montana's environment plays in our recreational activities, economic viability, and our ability to combat climate change.

With increased visitation to our state combined with the effects of climate change that are impacting Montana, we rely on you to continue being our champion for access to public lands, clean water, climate and clean energy infrastructure, and environmental sustainability.

We're asking you to keep up the fight and make sure Congress passes all of the impactful public investments needed to fight climate change, drive clean energy innovations and create millions of good-paying jobs.

The current infrastructure legislation you've been instrumental in driving forward is a historic step forward. To avert even worse consequences from the climate crisis that Montanans are seeing and feeling every day, Congress has to do more.

Will you continue to be a champion for our Montana way of life and support bold climate solutions essential to the future of our state?

Sincerely the undersigned Montanans,

Robin Abeshaus
Morgan Ahman
Maryan Alderson
